TITLE : SURFACE MOUNT TYPE LIGHT  
EMITTING ELEMENT

ABSTRACT : PURPOSE: To provide a surface mount type light emitting element which can improve reliability of a product and present cost increase.

CONSTITUTION: In the surface mount type light emitting element, connection parts which are brought into contact with electrode parts of a light emitting diode chip 30 are arranged on a first electrode part 26 formed on a board 22 and a third electrode part 34 formed on a flexible board 32. The one electrode connection part of the light emitting diode chip 30 is connected with the first electrode part 26, and the other electrode connection part is connected with a second electrode part 28 via the third electrode part.
